SMART-BIN & SUSTAINABLE MOBILITY NETWORK

Say-Do Gap

In 2022, an academic study proving a systematic gap between environmental values and actual behaviors.

Cost Barrier

Lack of Convenience

No Instant Motivation

How Can We Improve The Citizens Engagement In Recycling?

EXISTING SOLUTIONS

Deposit – Return Systems

Smart-bin and waste-optimization

OUR PROPOSITION

Gamification to improve motivation

How It Works?

Smart bins + QR

Scan to identify the user and log recycling activity.

AI Waste Detection

Verifies correct sorting and cuts contamination.

Digital Rewards

Points for sustainable transport and culture.

Real-time Data

Cloud tracking of rates, fill levels and compositions.

Revenue & Business Model

Government

Pays a fixed amount to run and maintain the platform.

Private companies

Commission on redeemed rewards.

Future plans

Share of recycled-material sales and in-app advertising.

Inclusion & Sensitivity

Universal Access

Placed at reachable levels for everyone, including citizens with physical disabilities.

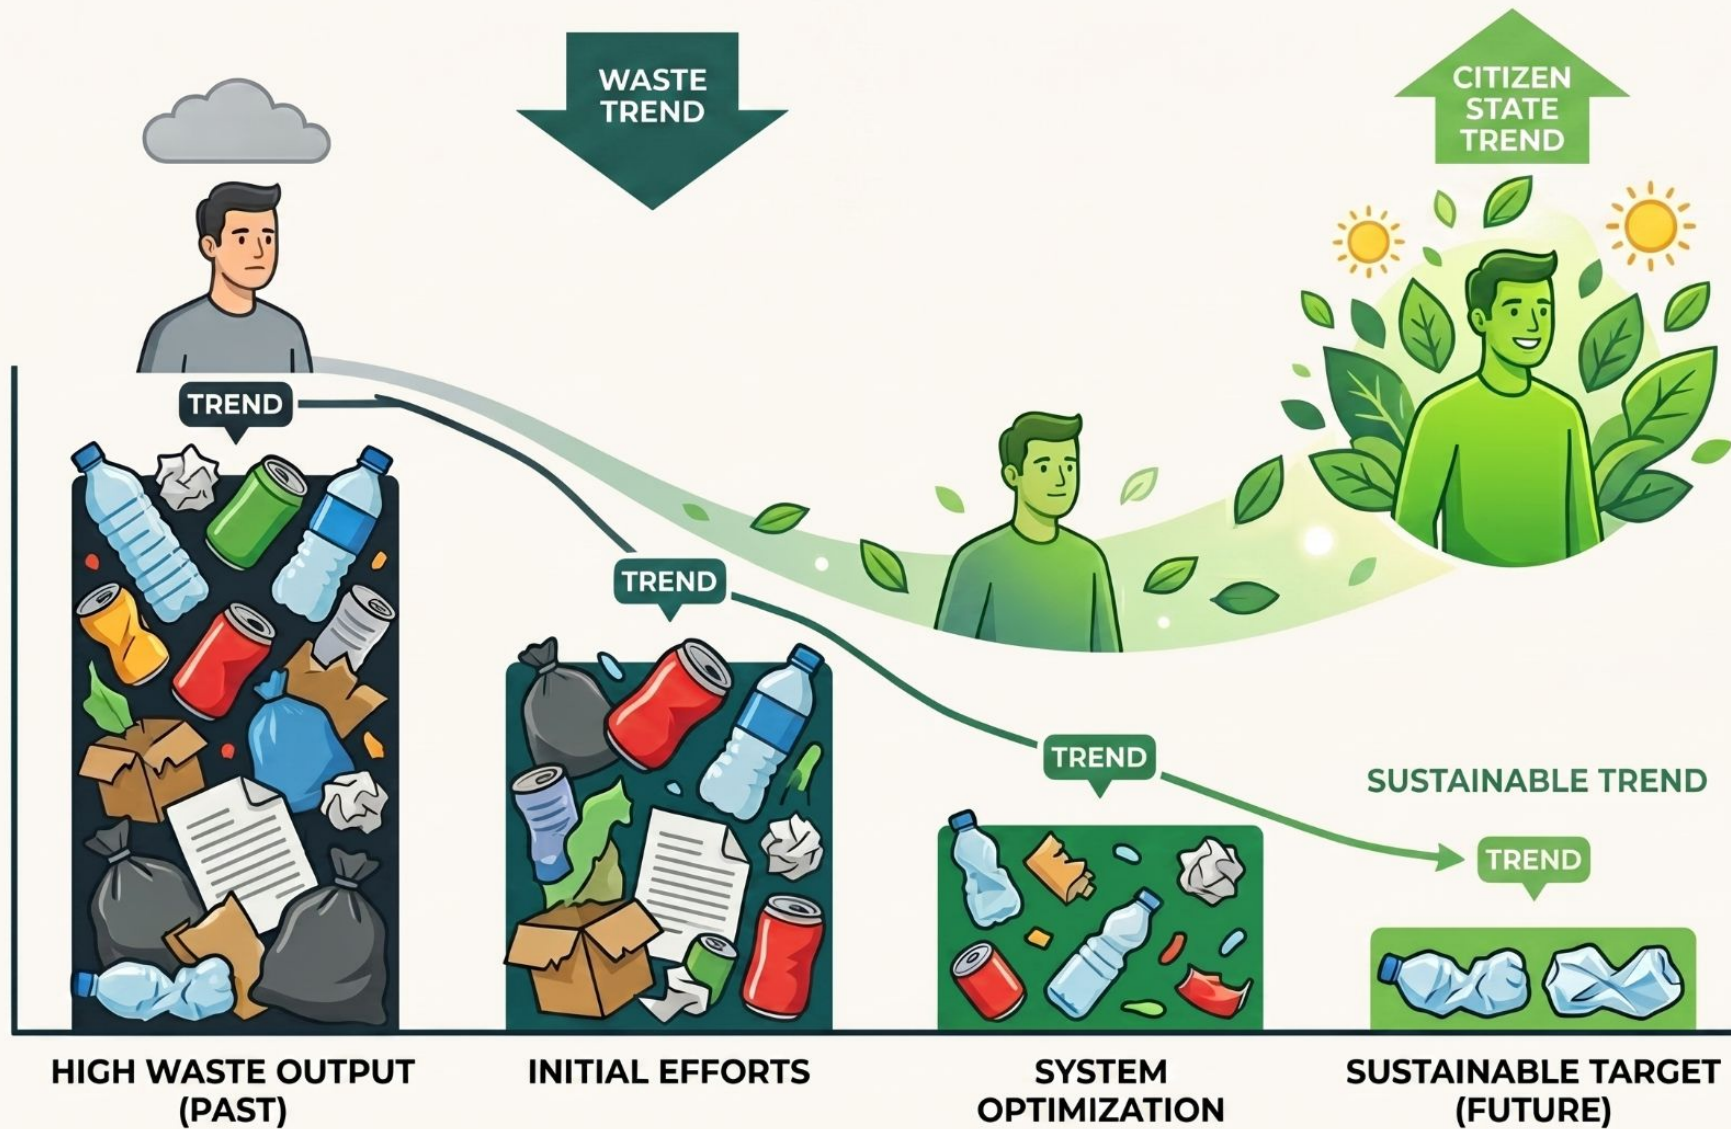

Designed for Kids

Intuitive visual interface and safe physical design so children can learn habits easily.

Smart Placement

Located in strategic public areas to ensure a reachable and safe experience for all.
